

SECTION VI

STUDENT ENROLLMENT BY PROGRAM

This section provides enrollment data by school as well as degrees conferred and majors by degree program using Classification of Instructional Program (CIP) codes. This section also contains summaries of the data on majors in degree programs that are provided through the Student Statistical Profile series of reports.

Highlights:

- (1) The enrollment of students at Ole Miss by unit can be divided into three groups with slightly less than half in the College of Liberal Arts, slightly over one-fourth in the Schools of Business Administration and Accountancy combined, and slightly less than one-third in the remainder of the schools.
- (2) In academic year 2000-01, the University graduated 1,777 students with Bachelors degrees, awarded 685 Masters/First Professional (Law and Pharm D) degrees, and conferred 92 Doctoral level degrees.
- (3) Since Fall Semester 1981, a comprehensive set of reports, Student Statistical Profile, has been produced each semester to provide a detailed description of students enrolled in each degree program. An explanation and examples of these reports are provided.
